MODEL# SVMR, SVMB

Stinger voltmeter, 3-digit display w/ turn-on circuit

Wiring Schematic

Red (power) - wire to +12V constant source at location of desired reading
Black (ground) - wire to chassis ground
Blue (trigger) - wire to a +12V switched source (ignition) or to radio remote turn-on

Cover Removal

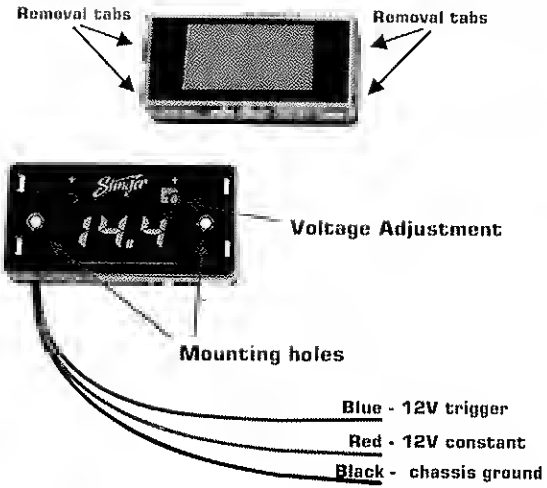

depress both tabs located on either side to remove cover

Mounting Options

Option 1 - can be secured by (2) mounting holes located under cover with supplied screws
Option 2 - can be fastened by a piece of double sided tape
Option 3 - can be custom mounted by two thin strips of double side tape on front cover then back mounted for a more custom look

Voltage Adjustment

test voltage at red and black wires on **SVMR /SVMB** with a small phillips or slotted screwdriver adjust meter to match reading from previous test.
counterclockwise - voltage increase
clockwise - voltage decreased
