TX6BMW.E

8” 20cm 3-way Separate Speakers for BMW & Mini (Old versions, small midranges with small frames)

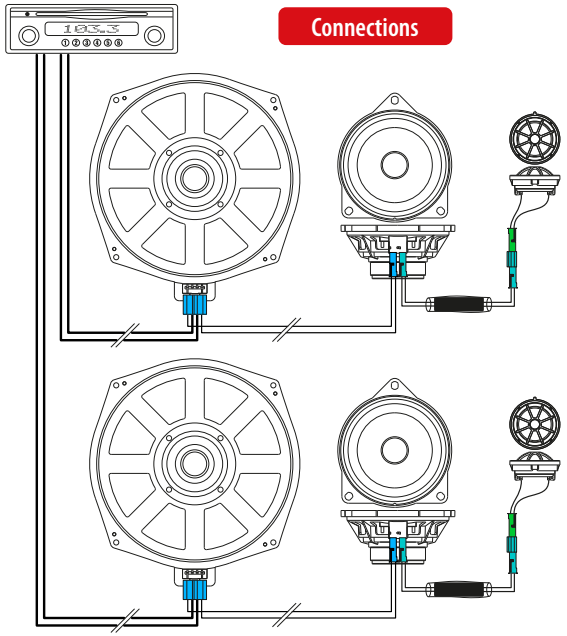

- Very easy to install thanks to the original BMW frames and the original BMW connectors.
- Nothing to cut, drill or solder
- Zero modification on the car.
- Breathtaking sound quality, largely beyond the original BMW Harman option.
- Amazing sound quality with big & low bass when just connected to the original BMW head-unit.
- Luxurious speakers equipped with neodymium magnets and treated paper cones.
- Ultra-shallow woofers (only 38mm thick) with reversed motor structure, grilles and protective fabrics to prevent dust in the gap.
- Comes with tweeter brackets and all necessary passive x-overs.
